Website's Vision, general aesthetic & design

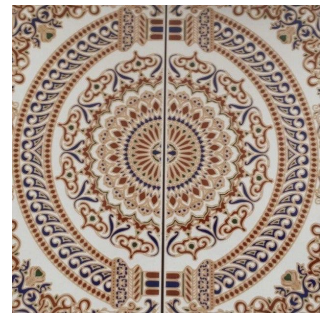

Good coffee, good books, & hopefully... Good code

- I don't know much code or design, but I do know myself
- I love coffee, reading, travelling, & learning languages
- Leaving a trail of breadcrumbs..
- Minimalist design with a consistent colour scheme
- Not only an indication of certain skill-set, but an insight to a potential employee as an individual

People are an amalgamation of lived experiences, circumstance, and some agency and free-will.

A small attempt to articulate my own composition :)

Components:

#profilepic: hover {

This transition effect adds little personal touch and a bit of fun

Utilising hover transition effect to add another layer & more depth of meaning and personality to the website

Was proving an uphill battle, but then clip-path: () came to the rescue! Though will continue be playing around with this over the weekend to sought out responsive issues with mobile!

}

Components: giving life to the experience

Rotation also adds vibrant colour for contrast and transform: scale () allows icon image to likewise ‘come to life’ when hovered with mouse.

Simple feature generates a very smooth but visually pleasurable website engagement and experience, with direct links to corresponding social media pages.

Some Animations & Styling

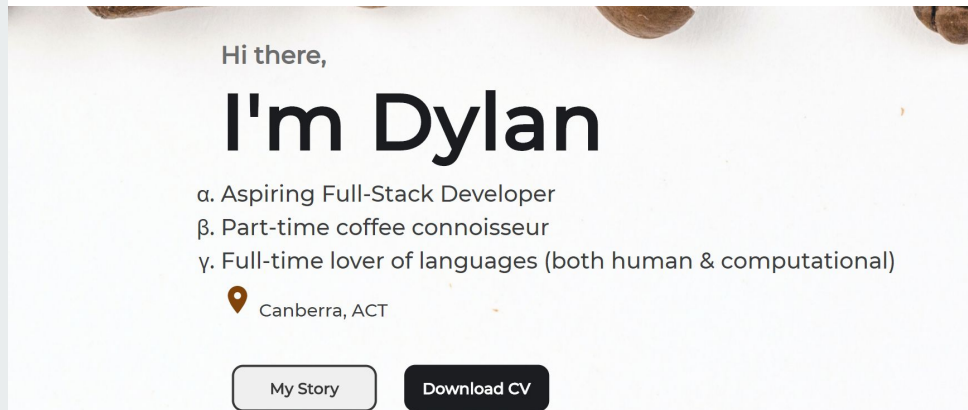

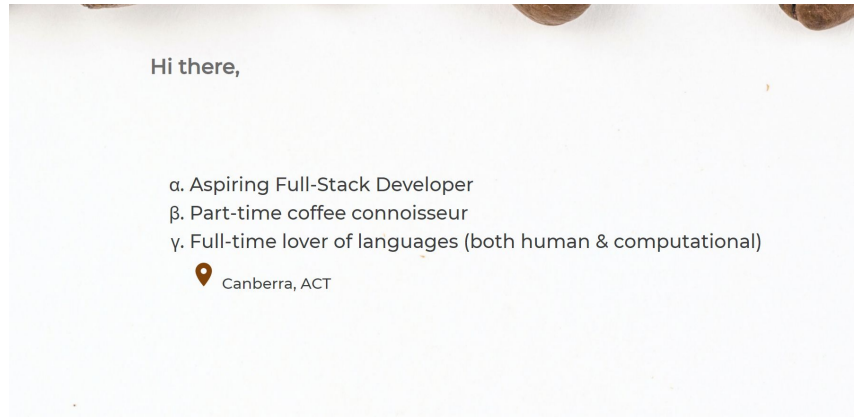

Employing animation when loading page specifically focusing on introducing the site with “Hi there” floating in followed by delayed animation of my name entering as well, emphasising the person and identify at the centre of the portfolio.

Buttons slowly appear after “I’m Dylan” text is animated. Set Opacity to 0 and used @keyframes btn {0% {opacity: 0;} 100% {opacity: 1;}}

Also styled button appropriately with colored theme

Coming out left of field ----->

Components: old-school blog experience

Traditional blog lay-out

Styled the html, adding some life and colour to the reading experience, while ensuring the styling used respects the over aesthetic and colour scheme of site

<article> element employed; hosted blog posts in flex-box & also used border-bottom to set a demarcation for the subsequent blog post

19 September 2020 | Coffee + Chocolate: find me a better combo, I'm waiting
